Contact Organics Weed Terminator delivering non-toxic weed management*

Contact Organics is pleased to announce launching a specialized product range in New Zealand. Due to continued interest and demand **Contact Organics** has launched a New Zealand website, offering more information about our unique weed terminators. The Contact Organics Weed Terminators are available for purchase online and in selected New Zealand stockists.

There is an undeniable need for efficient alternative weed control. **Contact Organics** currently offers two of the best in the class of weed terminators in New Zealand: HomeSafe Weed Terminator and LocalSafe Weed Terminator.

Our new website provides more info for each product, our patented delivery technology, specific weed management info and much more.

Contact Organics products in New Zealand are distributed by Enviro-Ag.

Contact Organics Weed Terminators available in select nurseries in New Zealand

About Contact Organics

Contact Organics develops and manufactures proprietary, high performance, non-toxic weed management products worldwide. In New Zealand, the company markets them under HomeSafe™ and LocalSafe™ brands for domestic, commercial, public and amenity applications. **Contact Organics** holds a strong patent portfolio and its growth is fuelled by the global trend towards environmentally sustainable weed management and agriculture for the future. Established in Australia in 2014, the company Headquarter is in Melbourne. Contact Organics products are manufactured in both Melbourne and Bangkok, Thailand. The Company is in process of securing regulatory approvals in its key world markets and setting up its global distribution channels.
